

## When you don't want to compromise your working safety

If working in applications with H-Class hazardous dust or asbestos, safe dust handling is a key parameter. Our series of certified H-class vacuum cleaners offers a convenient and easy-to-use solution with features which enhance safe working.

The build-in FlowSensor and acoustic warning signal monitors air speed in the suction hose to make sure that it does go below the minimum 20 m/s.

A safe and easy-to-use solution for demanding applications.

ATTIX 7 is a mid-size safety vacuum cleaner with high performance and reliability. AntiStatic hose system is the perfect feature for general cleaning in environments with hazardous dusts. ATTIX 7 features a 70 liter stainless steel container, which can be emptied by tilting or lifting off of the robust steel frame. Truly an Industrial Class performer.

In all models, your operating costs are minimized and user-friendliness reaches an all-time high with the low working sound level which lets you work when others are nearby without disturbing them. All Health & Safety Vacuums fulfill the legal requirements as described in the IEC/EN 60335-2-69 standard.

Picture shown may not represent model quoted

- Approved for work with H-Class hazardous dust and asbestos
- Certified H-Class filter with 99.995 - 99.999% filtration efficiency
- Low working sound level - SilentPower - high performance that is seen, but not heard
- MultiFit accessory system for the ultimate in task flexibility
- Accessory storage and tool deposit
